TUTORIAL C2CARE

Remote Headset: control patient headset remotely

> ⚠️ Do not expose the headset lenses to the sun.

1 Verify that your patient is registered on the my.c2.care website and has a C2Care subscription at www.c2.care/en/individual-subscription/.
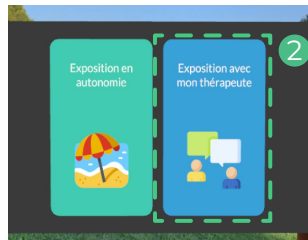

2 Your patient can use their virtual reality headset if it is compatible with C2Care or choose a subscription with the rental of a headset.

3 Ask your patient to:

1. Open a C2Care application in the headset.
2. Click on Exposure with my therapist.
3. Provide you with their association code.

4 In your my.c2.care account, tap Connect a remote headset.

5 Enter the association code in the field that appears.

6 Launch a C2Care app. You can monitor and see your patient's exposure in real time.
