TUTORIEL C2CARE

Installation guide for C2Care Applications on Oculus Quest

⚠️ **Do not expose the headset lenses to the sun.**

I

Installing Meta Quest app and developer mode on your phone/tablet

If you have received your Meta Quest 2 and have already :

❶ Installed the Meta Quest app on your phone
❷ Created a Meta account
❸ Paired your Meta Quest 2 to your app

Go to 4. Enabling Developer Mode, otherwise follow the steps 1 - 3 :

1 Open Meta Quest (Oculus) ⬭ app on your smartphone or tablet. If you don't have it, download it on the Play Store or Apple Store.
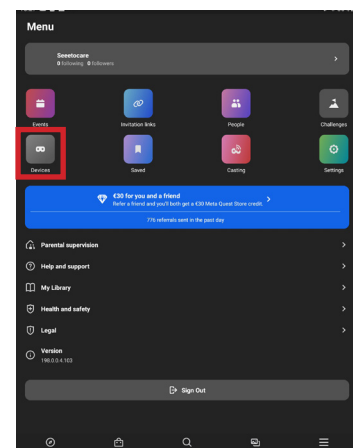

**2** After downloading and opening the app, create an account using one of the following options.

Continue Using Facebook

Continue With Instagram

Set up account with email address

Log in with email address

Have an Oculus account? **Log in**

3 Pair your Meta Quest 2 with the code display in your headset or it could be automatically detected.

Look into your headset for a 5-digit code and enter it here.

4 Enabling Developer Mode : Go to Menu and select Devices.

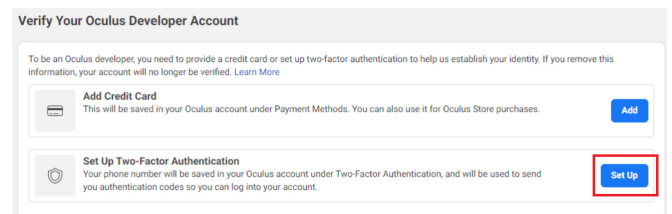

C2 CARE

5

Select Developer Mode, then click on Get started.

6

Once on the redirected page, follow the link indicated below.

7

Verify your Developer account by clicking on the Set Up button.

8

You will be redirected to a *Password and security* page, click on Edit at the two-factor authentication level.

9

Press Add Phone Number and enter the verification code received on your phone.

10

Return to the tab in step 7 and click Back to Home.

11

Create your organization:
1. Enter the name of your choice
2. Accept the conditions
3. Press Submit

12

Go back to the Meta Quest application and enable the Developer Mode as displayed below.

Installing Drivers and SideQuest on your computer

1

Now you will have to install the drivers (this manipulation is only necessary if you are on Windows, otherwise go to step 5). To do this, go to the following address: https://developer.oculus.com/downloads/package/oculus-go-adb-drivers/ and click on the Download button.

### Oculus Go ADB Drivers
Published: May 9, 2018

VERSION ˅   **DOWNLOAD** ↓

2

Select the download folder from your computer.
Right-click on the folder and select Extract here. Now you can open the file you just unzipped by double clicking on it.
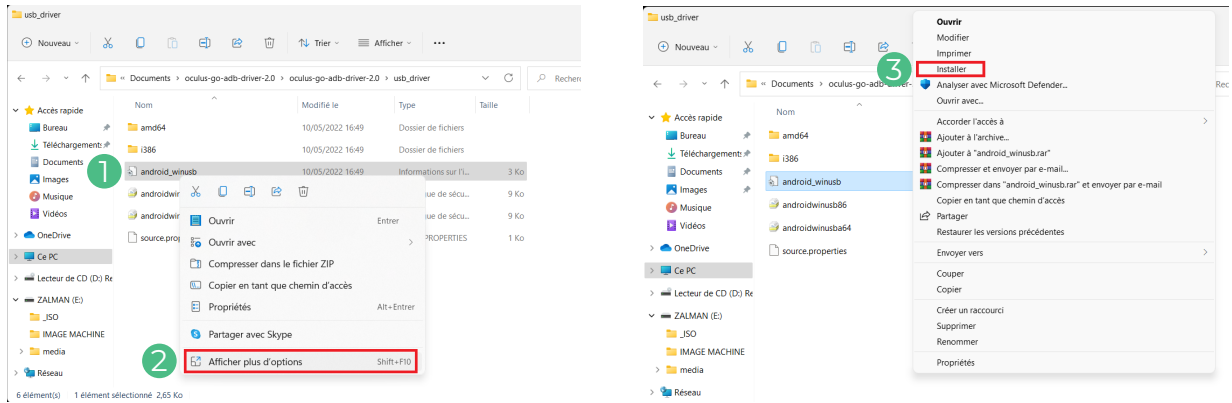

3

Once opened, right click on the android-winsub.inf file and click Install.

4

If your computer is under Windows 11 you will have a few more steps to find the button allowing you to install android_windsub.

❶ Right click on android_windsub.inf
❷ Click on Show more options
❸ Click on Install

5

Go to https://sidequestvr.com/setup-howto to download and install SideQuest **Advanced Installer**.

1

The C2Care applications (in .SDK) are downloadable through these links :

C2Hypno : https://media.c2.care/app/last/quest/c2hypno.apk
C2Custom : https://media.c2.care/app/last/quest/c2custom.apk
C2Drive : https://media.c2.care/app/last/quest/c2drive.apk
C2Phobia : https://media.c2.care/app/last/quest/c2phobia.apk
C2Addict : https://media.c2.care/app/last/quest/c2addict.apk
C2Nutri : https://media.c2.care/app/last/quest/c2nutri.apk
C2Physio : https://media.c2.care/app/last/quest/c2physio.apk
C2Companion : https://media.c2.care/app/last/quest/c2companion.apk
C2Brain : https://media.c2.care/app/last/quest/c2brain.apk
C2Neuro : https://media.c2.care/app/last/quest/c2neuro.apk
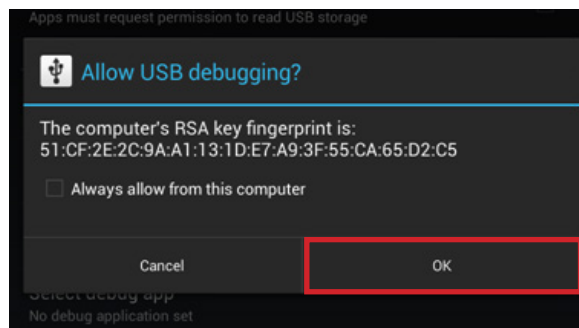

2

Now connect your headset to your computer via your USB cable and the port on the left side of it. Once your headset is connected to your computer, put on your headset.
You will see the following message :

Apps must request permission to read USB storage

🔌 Allow USB debugging?

The computer's RSA key fingerprint is:
51:CF:2E:2C:9A:A1:13:1D:E7:A9:3F:55:CA:65:D2:C5

☐ Always allow from this computer

Cancel   OK

Select debug app
No debug application set

Check the Always allow from this computer box to stop receiving the message next time you reconnect the headset and click OK.

3

Now go back to the SideQuest software on your computer, you will see a green dot at the top left of the software window.
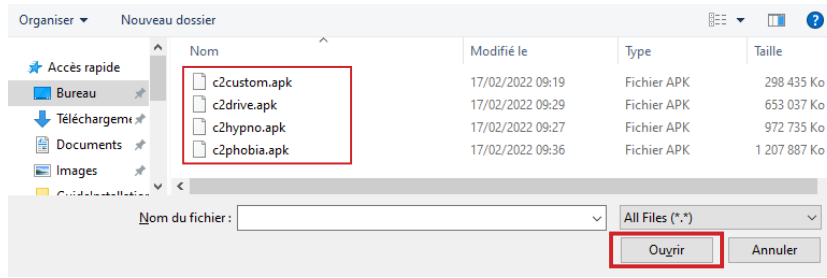

🟢 v0.10.27 Oculus Quest 2 🛜 192.168.2.104 🔋 75%

4

You can now click on the 🔽 Install APK file from folder on your computer icon.

← 🌐 → 🛜 🔽 📁 ⊞ ≕ 🔧 🗗 🐞 _ 🗗 ✕

C2 CARE

5

You will now have a window that has just been opened. You have to select the software files that you had previously downloaded.
Once you have selected all the software you are interested in, press the Open button.

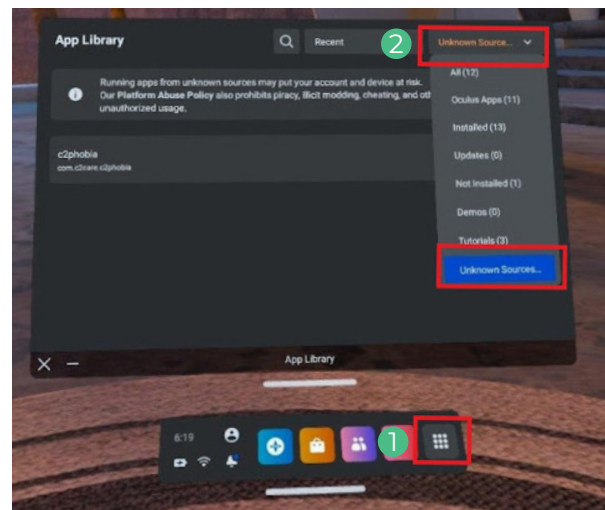

You can now unplug your headset from your computer.

IV

Launch software from the Oculus Quest

1

You will find in your library the software you have just installed.

❶ Go to the Applications in the menu bar.
❷ Go to the top right menu of the applications interface and select Unknown sources.
❸ Here you can find and open all the applications you have downloaded and installed.

2

When you launch an application for the first time, you have to note the 5-character identification code that appears in the headset.

❶ In your account on the website my.c2.care, tap Add a wireless headset.
❷ Enter the code in the field provided.
❸ Click on Connect.

From now on you can use C2Care applications.
